DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22 (part), 23-33, drawn to a method for improving plant growth characteristics comprising increasing, in a monocotyledonous plant, expression of a nucleic acid encoding a NHX protein, or plants obtained by said method.

Group II, claim(s) 22 (part), 23-33 drawn to a method for improving plant growth characteristics comprising increasing, in a monocotyledonous plant, activity of a NHX protein, or plants obtained by said method.

Group III, claim(s) 34-40, drawn to a method for the production of a monocotyledonous plant having improved growth characteristics comprising introducing and expressing a nucleic acid encoding a NHX protein.

Group IV, claim(s) 41-47, drawn to a method of administering a genetic construct to the monocotyledonous plant.

Group V, claim(s) 48 (part), 49-51, drawn to a method for improving the growth characteristics of a monocotyledonous plant comprising administering a nucleic acid encoding a NHX protein to the monocotyledonous plant.

Group VI, claim(s) 48 (part), 49-51, drawn to a method for improving the growth characteristics of a monocotyledonous plant comprising administering a NHX protein to the monocotyledonous plant.

The inventions listed as Group I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1638

The technical feature linking Groups I-VI appear to be a nucleic acid sequence encoding a NHX protein.

However, Yokoi et al. (The Plant Journal, 30:529-539, 2002) disclose a nucleic acid sequence encoding a plant Na^+/H^+ transporter protein (same as NHX protein).

Therefore, the technical feature linking Groups I-VI does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over prior art.

Accordingly, Groups I-VI are not so linked by the same or a corresponding special technical feature as to form a single general inventive concepts.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
